

I. AMENDMENT**In the Specification**

Please replace the second full paragraph on page 7 that starts with “The water insoluble mucoadhesive polymer ...” with the following amended paragraph:

The water-insoluble swellable mucoadhesive polymer is polyacrylic acid cross-linked with polyalkenyl ether or divinyl glycol. Preferably, the water-insoluble swellable mucoadhesive polymer is Noveon or Carbomer. ~~For example, when the water-insoluble swellable mucoadhesive polymer is Noveon, it may be present in the pH-sensitive mucoadhesive layer at a concentration of from 33% to 80% w/w.~~

Please replace the third full paragraph on page 7 that starts with “The pH-sensitive polymer may be a copolymer of ...” with the following amended paragraph:

The pH-sensitive polymer may be a copolymer of methacrylic acid and acrylic or methacrylic ester. More preferably, the polymer is a Eudragit polymer, or a chemical derivative thereof, ~~and may be present at a concentration of from 20% to 67% w/w.~~
